

INVITATION

The Executive committee of ICAI Doha Chapter cordially invites its members to a seminar followed by dinner as per below details.

Date/Time: Wednesday, 29th May 2013, 6.30pm to 9.30pm

Subject: Seminar on "Cybersecurity"

Venue: Crowne Plaza Hotel-The Business Park, Airport Road, Doha

Speaker: **Stephen Brennan**, Global Technical Services Lead, CSC Cybersecurity.

Speakers' Profile

Stephen Brennan Leads CSC's Global Cybersecurity Technical Consulting practice, directing team of highly skilled specialist experts. Stephen is based in CSC's Australia's Sydney offices, and travels frequently on behalf of CSC and clients around the world. A proven security leader, Stephen has worked on all facets of Cybersecurity including: hardware, software, managed services, policy, privacy, threat mitigation, compliance, and governance. Initially a hardware and software hacker, Stephen spent many years developing and writing first to third generation languages on a wide range of, platforms and has extensive experience in information architecture, design as well as database and system administration. His depth of knowledge and experience across such a wide range of domains has allowed Stephen to understand both the art and science of security, and is a recognized thought leader in the space of threat protection and knowledge management - presenting regularly at industry leadership events. Stephen maintains an above Secret security clearance with several Governments, and is active in the fight to defend critical infrastructure enterprises from all cyber threats. Stephen has worked on security for the United Nations annual Conference of Parties, and the development of systems and solutions to address the growing profile of Advanced Persistent Threats (APT) and the challenge of knowledge management and threat intelligence at a time when countries and citizens are placing increasing demands and constraints around data and privacy. Stephen's approach to evaluating real world security as a business driver for organizations has led to the development of proprietary risk assessment methodologies that allow security officers and senior executives to assign a quantifiable value to security risks and initiatives supported by specific business goals and objectives. By focusing on the key business assets, Stephen has helped hundreds of organizations achieve an in-depth evidence based understanding of how to apply protection to areas where it is needed most. An in-depth working knowledge of compliance intent and requirements of such programs as HIPAA, ISA99, PCI-DSS and ISO27000 allow organizations can achieve both compliance AND effective security.

Kindly confirm your attendance by replying to this email or send confirmations to icaidohachapter@gmail.com latest by 23rd May 2012 to make arrangements. We have applied to ICAI for approval of 3 CPE hours for this event.
